

Who do you want to become?

Steve Jobs Academy trains professionals in the software development, marketing and digital fields through two-year courses with an informal, hands-on approach.

The lessons

The lessons are carried out over four semesters for a total of 1800 hours, divided into 1080 hours in the classroom and **720 hours of work experience** in companies in the **ICT sector**.

Subject areas

The **Marketing and Design** area was conceived for all those students that want to achieve digital marketing expertise and acquire the design skills the market asks for most.

The **Software development** area is dedicated to students who want to master the most advanced IT technologies, that allow them to create web and mobile applications, websites and data analysis.

DIGITAL SPECIALIST

The curriculum

The **Steve Jobs Academy** is the only ITS in the south of Italy that allows you to specialize in the ICT sector, one of the most dynamics sectors in Europe. For this reason we provide training courses with obligatory attendance oriented to **laboratory-style learning**.

The training

Thanks to an **innovative course** and an **in-company training work experience**, you will be easily stimulated to learn and immediately put in the position to acquire **high-level technological skills**.

The benefits

Class sizes are limited to 30 students. Those that pass the entrance test will be entitled to a **scholarship** that covers the whole cost of the course.

The **Steve Jobs Academy** is a bridge for the **new digital professions**, in fact to date the percentage of employed students within a year of obtaining the diploma, is **86%**, according to the Sole 24 ore newspaper.

The advantages of the Academy

- Teaching staff composed of sector professionals, entrepreneurs and university professors.
- Approach to work oriented to problem solving, through the Design Thinking method, closely connected with the new trends of the market.
- Validation of university credits (CFU) for students that have already completed university studies.
- Work experience in companies of the ICT sector to consolidate the classroom learning and acquire the skills that are really requested by the world of work.
- Level 5 EQF diploma issued by the MIUR, Italian Ministry of Education.
- High opportunity for employment post diploma. The employment rate of the students at the end of the course is 86%.
